Subject: Change in TIP

Leo,

We requested fuel as capital under the 5307 Funding availability notice that came out in January. We had to apply for the funds through the LADOTD since we are a small urban system. I recently received notice that we were approved to spend 179,020 of our 2012 FFY apportionment on fuel. Since we have already requested and have an approved parish budget which includes funding for fuel under the operating part of our Program of Projects, we will need to amend our POP to include the fuel apportionment under the capital line item and reduce the operating cost accordingly.

The adjustments that need to be made in the TIP for our 2012 POP are as follows:

Line	Project Name	Project Number	Fund Ratio	Primary Funds	Federal Funds	State and Local Funds	Total Cost
1	Urban Operating Assistance	LA90X Houma 12	50/50	5307	\$504,788	\$504,788	\$1,009,576
2	Urban Planning Assistance	LA90X Houma 12	80/20	5307	\$69,232	\$17,308	\$86,540
3	Urban Capital Assistance (Fuel as Capital)	LA90X Houma 12	80/20	5307	\$179,020	\$44,755	\$223,775
4	Urban Preventative Maintenance Assistance	LA90X Houma 12	80/20	5307	\$411,266	\$102,817	\$514,083
