

Regional Transit Committee Update

April 22, 2021

The Regional Transit Committee meet on February 17, 2021. The draft minutes from that meeting are included in your meeting packet for you to review at your convenience.

At the meeting we discussed the need for the MPO to adopt the CHSTP every other year. Currently, there is no formal process in our Public Participation Plan to do so. It was suggested that the Transit Committee be formally recognized in the MPO Bylaws as the Transit TAC, and that the PPP be amended as appropriate. This idea also went before the TAC at the March meeting. We've got this later on the agenda for further explanation and discussion.

Further updates:

- Most agencies still running at reduced capacity due to COVID
- Greyhound operations are continuing in the region and across the state following all CDC guidelines
- LA Clean Fuels has been awarded a grant called "Drive for EVs in the USA" and are looking for form "Drive Electric" chapters throughout the state
