## STATE POLICE TROOPS

### STATEWIDE NO REFUSAL

- ★ State Police Troop Headquarters
- T State Police Troops
- Full Time
- Not Participating
- Part Time

This document and the information contained herein is prepared solely for the purpose of identifying, evaluating and planning safety improvements on public roads which may be implemented utilizing federal aid highway funds, and is therefore exempt from discovery or admission into evidence pursuant to 23 U.S.C. 402.

## Starting a No Refusal Initiative

The following have been identified as important components for a successful No Refusal initiative:

### **1. Partners**

- a. Judiciary – if conducting in and out of city limits, may want to involve both city court judges and district court judges.
- b. Medical personnel for blood draw – Ex. EMS, nurse on grant contract, prison medical staff, fire department, etc.
- c. Law Enforcement Agencies – LSP, local police departments, and sheriff's offices – helpful to get any DWI taskforce members involved.
- d. Prosecutors – Helpful to have City Prosecutors and District Attorneys.
- e. Community – Helpful for publicity and support – local media, schools, etc.

### **2. Warrants and Procedure**

- a. For examples, see warrant templates and No Refusal protocol from Jefferson Parish, Tangipahoa Parish, and East Baton Rouge Parish.
- b. Digital Warrants – assess access to digital warrants in jurisdiction. Ex. Cloud Gavel.
- c. If no digital warrants, assess procedures for faxing warrants.
- d. Train officers in No Refusal procedures and blood draw procedures.

### **3. Blood Draw Procedures**

- a. Figure out what works best for your parish. Examples include:
  - i. EMS on call to respond to parish prison when driver booked.
  - ii. EMS on call, blood draw to take place in EMS vehicle.
  - iii. Fire Department on call to perform blood draw.
  - iv. Nurse on contract with highway safety funds to be at parish prison when No Refusal initiatives take place.

### **4. Publicity**

- a. Media blitz (regional coalition may want to take the lead).
- b. Target students, contact all higher education providers.
- c. Social media – Facebook and Twitter.
- d. DOTD message boards.

### **5. Coordinate all Partners**

- a. Meet with all partners in order to discuss warrants, warrant procedures, blood draw procedures, choose dates for initiative, discuss publicity strategies.

### **6. Data**

- a. Create system to collect and maintain data from No Refusal initiatives. Number of refusals, number of warrants, etc. Data collection helps justify funding and sustenance of initiative, as well as promote initiative to other parties and regions. Much easier to collect data from beginning instead of retroactively attempting to collect.

Re: Drug Evaluation Classification Program/Drug Recognition Expert School

Dear Name:

As drug-impaired driving in Louisiana increases, the use of Drug Recognition Experts (DREs) has become crucial in the effort to reduce the deaths and injuries caused by this crime. The National Highway Traffic Safety Administration has determined that a properly trained DRE can successfully identify drug impairment and accurately determine the category of drugs causing such impairment, thus increasing the chances of a successful prosecution.

The Louisiana State Police Training Academy, Applied Technology Unit, will host a Drug Evaluation and Classification Program, Drug Recognition Expert (DECP/DRE) School from April 30 – May 10, 2019. Field certifications for those who qualified will follow from June 10 - 16, 2019, in Jacksonville, FL. This class is fully funded by the Louisiana Highway Safety Commission, so the students' agencies pay nothing for their officers to attend.

As team leaders of the Impaired Driving Emphasis Area (IDEA) team of the Coalition Name, we urge you to take advantage of this generous offer and allow one or more officers to apply for this training. Attached to this letter is the application the officer(s) must submit in order to attend the course. The deadline to submit the application is April 5, 2019.

A member of our coalition will contact you in a few days to further discuss this training opportunity with you.

Thank you in advance for considering our request and for working every day to keep our streets and highways safe.

Sincerely,

Name

FROM: Lt. Colonel Jay D. Oliphant, Jr.  
Deputy Superintendent - Patrol

SUBJECT: Drug Recognition Experts (DRE) Utilization

In an effort to enhance prosecution for Driving While Intoxicated (DWI) and Driving Under the Influence of Drugs (DUID) when motorists are encountered during a traffic stop and/or are involved in a vehicle crash, the Louisiana State Police is aggressively focusing on encouraging the use of Drug Recognition Experts (DRE's). During an arrest for DWI, or crash investigation when a serious/fatal injury has occurred, or it is likely that a fatal injury may result from the crash, officers shall make every effort to utilize all available means to evaluate drivers or suspected drivers to determine if they are impaired. Officers should inspect the driver for the smell of alcoholic beverages or other drugs, bloodshot eyes, fumbling fingers, slurred speech, admission of drinking or drug use, abusive language, inconsistent responses, etc. Officers should also be

*COURTESY • LOYALTY • SERVICE*  
*"An Equal Opportunity Employer"*  
*P.O. BOX 66614, BATON ROUGE, LOUISIANA 70896*

observant of the interior of the vehicle for alcoholic beverage containers, drug paraphernalia or other contraband that are in plain view. Those persons suspected of impairment should be subjected to a battery of Standardized Field Sobriety Tests. If impairment is obvious and the blood alcohol level (BAC) is low or does not equate to the level of impairment observed, a DRE should evaluate the subject or be consulted according to Louisiana State Police policy. Drug Recognition Experts are highly-trained to recognize the indicators of impairment from alcohol and/or drug use, so along with an effective traffic education and enforcement strategy, we can help to reduce serious injury or fatality crashes in the state of Louisiana.
